Rich,

I have also uploaded the MBAS results and the Metals. Turn-around times for the VOCs, SVOCs, and glycols is longer (originally 21 days). If any values above screening levels then would conduct a full review on that compound sooner.

Cindy,

I am just double checking that we only have TPH and dissolved gases in validated final data (emailed and uploaded to the FTP).

No final validated results yet for glycols, VOCs or SVOCs.

Right?

Rich
